

SARAHAI

5G Wi-Fi Access Point

SKU SARAHAI-OUTDOOR

Overview

Our all-weather, edge network appliance, featuring crypto acceleration, supporting 5G and Wi-Fi 6 connectivity, and IP67 & MIL-STD-810G environmental compliance. Designed as an outdoor, waterproof uCPE device deployed at the rugged edge, routing, security, industrial IoT and SD-WAN in the most demanding conditions.

With extreme temperature ranges this system can operate in -40°C to 70°C environments and is protected from dust and water; also compliant with MIL-STD-810G, a military standard that tests rugged network computers through a wide range of environmental conditions.

- Virtualized Node with Hypervisor Head End System Component
- 4 x GbE LAN, 2 x GbE POE+
- 1 x RS232/485 by M12 X-coded 8 pin Female with Isolation
- 1 x M.2 304(5)2 B key socket for 5G
- 1x M.2 2230 E Key socket for Wi-Fi 6
- Mini-SIM & 1x eSIM (reserved)
